

Sump Basin Cover Model: SF2000E

Made in the USA

One of our most popular covers, the SF2000E provides a gas and radon tight seal to any of our 18" diameter basins.

Constructed of heavy duty structural foam and injection molded the SF2000E will provide strength and reliability for decades.

It comes with fittings making it extremely versatile. We mold all of the fittings at our factory assuring a tight fit.
